LOGAN DIVING & SALVAGE'S SPECIALTY DREDGING DIVISION COMPLETES GEOTUBE DREDGING PROJECT

SAVANNAH, GEORGIA

TENCATE GEOTUBES® ONSITE AND CAPTURING DREDGE SPOIL

Logan Diving & Salvage has completed specialty dredging operations utilizing Tencate Geotubes® in Savannah, Georgia adjacent to the Savannah River. Logan's portable 24' aluminum barges were transported to the site and launched with heavy equipment. Dredging was accomplished with 2 of Logan's 6" proprietary portable hydraulic submersible diver dredge pumps and surface supplied commercial divers. One pump was used for the main with the other in line as a booster pump. Project was completed to client's satisfaction in 3 weeks on time and under budget.
